

Delivering for Plymouth

We're modernizing Plymouth's natural gas system by rebuilding and upgrading key infrastructure. The work will help ensure safe, reliable delivery of natural gas to our customers.

To learn more, visit ConsumersEnergy.com/pipelineupgrade

Sewer Locates - Crews will mark underground utilities in the work area. They may need access to the inside of customer homes or businesses to locate the sewer lines. Any flags or marks should be left in place until we complete our work. Customers should consider marking known sprinklers, invisible fences, etc.

Construction - Crews will perform underground work to install new, upgraded pipeline and may be able to bore underground, minimizing road closures and other disturbances.

Gas service will be interrupted for less than an hour. When complete, a crew member will relight pilot lights. Customers may opt to do this on their own. If they aren't available, we will leave instructions to request a relight.

Restoration - When all work is complete, all affected roadways, sidewalks and other areas disturbed by construction will be restored fully. Some restoration may be delayed because of weather (freezing conditions, etc.).

WORK AREA MAP

The map below shows the area where we will be working during the project
